

How to use ChatGPT: step by step guide to start ChatGPT

Step 1: access on the link below:

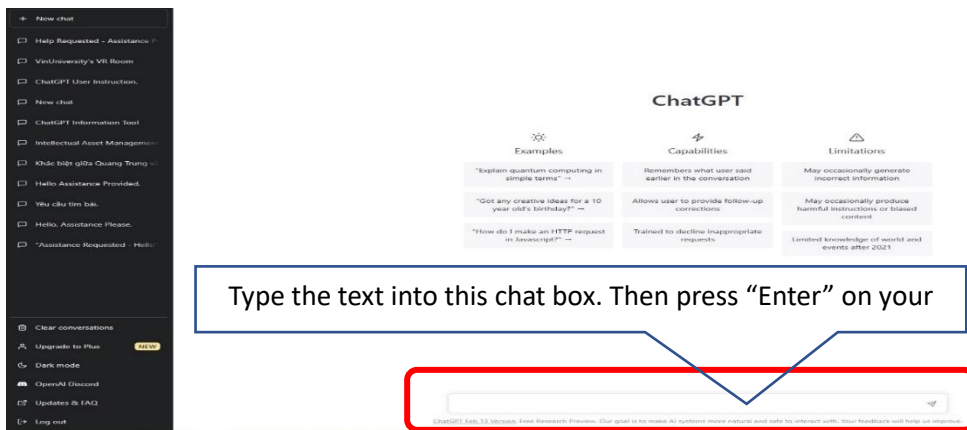

<https://chat.openai.com>

Step 2: log in with this account.

- **Username:** **libvinuni2023@gmail.com**
- **Password:** **123456789**
(Please **DO NOT** change the password)

Step 3: Start by typing your message or question in the chat box. You can ask ChatGPT about a wide range of topics, from general knowledge questions to advice on personal issues.

TIPS:

- Read the response from ChatGPT. If you have any follow-up questions, type them in the chat box and hit "Enter" again.
- ChatGPT will continue to respond to your questions until you decide to end the conversation. To do this, simply type "bye" or "goodbye" in the chat box, and ChatGPT will say farewell.
- If you want to restart the conversation at any time, simply start a new message by typing in the chat box.
- Please note that while ChatGPT is designed to provide helpful and informative responses, it is not a substitute for professional advice. If you have a serious medical or mental health concern, please consult a qualified healthcare provider.

Note:

After logging in, if the screen looks as below, please come back later and try it another time because ChatGPT is at capacity at that time.

ChatGPT is at capacity right now
